Recommendations:

Implementation of least privilege and separation of duties policies/processes/procedures. Create an access management system for customer's credit card information.

Creation of disaster recovery plan and procedure for backing up critical data.

Update to current password policies that meet industry standards and the creation of a password management system.

Implementation of a regular schedule for maintaining and monitoring legacy systems.

Update company's internal database to properly classify and inventory customer PII/SPII.

Implementation of an IDS and creation of procedures to implement encryption for all customer PII or SPII.
